

**Dystocia**  
**By Ange Pennell**

That was the last straw. The precious vial administered, we yearn for positive results in a month or two. Playing the waiting game is a monumental test of fortitude. Timing cycles for optimum outcomes, we're confident stringent measures are worth such angst.

It's not the first time we've used such procedures. It's appallingly expensive. But we both want this.

You have to be primed to handle failure.

There's abundant proof that it can work.

We've viewed his progeny online, double muscling evident from birth. Belgian Blue Boy throws magnificent calves and cows rarely suffer dystocia (difficult births).

Expecting Spring deliveries.
